

## How can we know on which mode is installed the datawarehouse?

Please use this query to see if your datawarehouse uses the partitioning mode through SQL Plus.

reference to undefined name 'syntax' Une exception de type

'MindTouch.Deki.Script.Runtime.DekiScriptUndefinedNameException' a été levée. (click for details)

The USER\_TAB\_PARTITIONS table describes partition-level partitioning information, partition storage parameters, and partition statistics determined by ANALYZE statements for all partitions owned by the current user.

IF you are using a partitioning mode, you have several tablespaces.
