

Deleting lines at operating/patches menu

Internal

You can remove the lines obsolete patches directly by calling our stored procedure for this purpose.

- Displays installed patches :

reference to undefined name 'syntax' Une exception de type
'MindTouch.Deki.Script.Runtime.DekiScriptUndefinedNameException' a été levée.
(click for details)

- Check the table `ActiveAgent` on `newtestcore` to confirm that no robot is linked to the package that you want to delete.

reference to undefined name 'syntax' Une exception de type
'MindTouch.Deki.Script.Runtime.DekiScriptUndefinedNameException' a été levée.
(click for details)

- Call the ps with the package name of the table package
reference to undefined name 'syntax' Une exception de type
'MindTouch.Deki.Script.Runtime.DekiScriptUndefinedNameException' a été levée.
(click for details)

This stored procedure only removes the corresponding row in the package table.
It is not necessary to remove the lines in the packageversion table.
