

Probes names Internal

There is no mechanism for renaming a probe. However, this action is possible.

How to rename a probe

There is no impact in the reporting because the probes are represented by an ID in database.

- Stop the probe
- Change the probe name from the NMC interface (component view)
- Check the new name in the database:

reference to undefined name 'syntax' Une exception de type

'MindTouch.Deki.Script.Runtime.DekiScriptUndefinedNameException' a été levée.

(click for details)

- Rename the repository (C:\Newtest\Probes\PROBENAME)
- Changing newtest.ini side (Site, SharedSite and eventually defgroup)
- Changing newtest.ini probe side (Site, SharedSite and eventually defgroup)
- Launch the probe
